

SEEDing

Stronger Together

Why SEEDing Stronger Together?

How can we nurture nonprofit collaboration to take root? At SEED Impact, we believe that stitching together the work of individual organizations into broader systems of care, and building their collective capacity to realize and credibly report systemic change can help **power the sector to realize its promise.**

SEEDing Stronger Together (SST) offers facilitated visioning, planning, strategic counsel, evaluation and impact reports to **strengthen nonprofit collaboration** and hasten meaningful collective solutions.

The organizations that SEED Impact serves are community-rooted and uniquely positioned to influence systemic change in their communities. Unfortunately, too often they lack the bandwidth and funding necessary to develop and implement **sustainable partnerships.**

Through SST engagement, they become better able to team up with allies, win joint funding proposals, and achieve **exponentially greater, lasting impact.**

- *Individual nonprofits achieve deeper results and improve cost-effectiveness and sustainability*
- *Networks measurably demonstrate collective impact and leverage each partner's best contributions for the greater good*
- *Sectors integrate systemic innovation on vital issues*
- *SEED Impact disseminates lessons learned*
- *Investors emerge as high-impact philanthropic leaders by leveraging resources for maximum impact*

Every gift to SEED Impact reaches many. Beyond the value of a grant to one organization/one mission, your gift to SEED Impact equips many organizations to report **increased outcomes in education, mental health, trauma-healing** and more.

What do SEED Impact investors most appreciate?

1. **Accountability**—periodic impact reports to understand the value of their investments, and
2. **Leverage**—adding value to dozens of organizations touching thousands of lives with each gift.

A visionary \$600,000 commitment launched our **initial SST cohort** in Spring 2023. Your **interest and investment** will develop new cohorts across the country and touch lives and communities most in need.
