WHY EVALUATE?

We want to
grow into our
potential...

**We want our
organizations to be
continually learning
and inventive.**

THE PROBLEM WITH EVALUATION IS...

We don't
really like it

We don't have
time for it

We don't learn
much but do it
for our funders

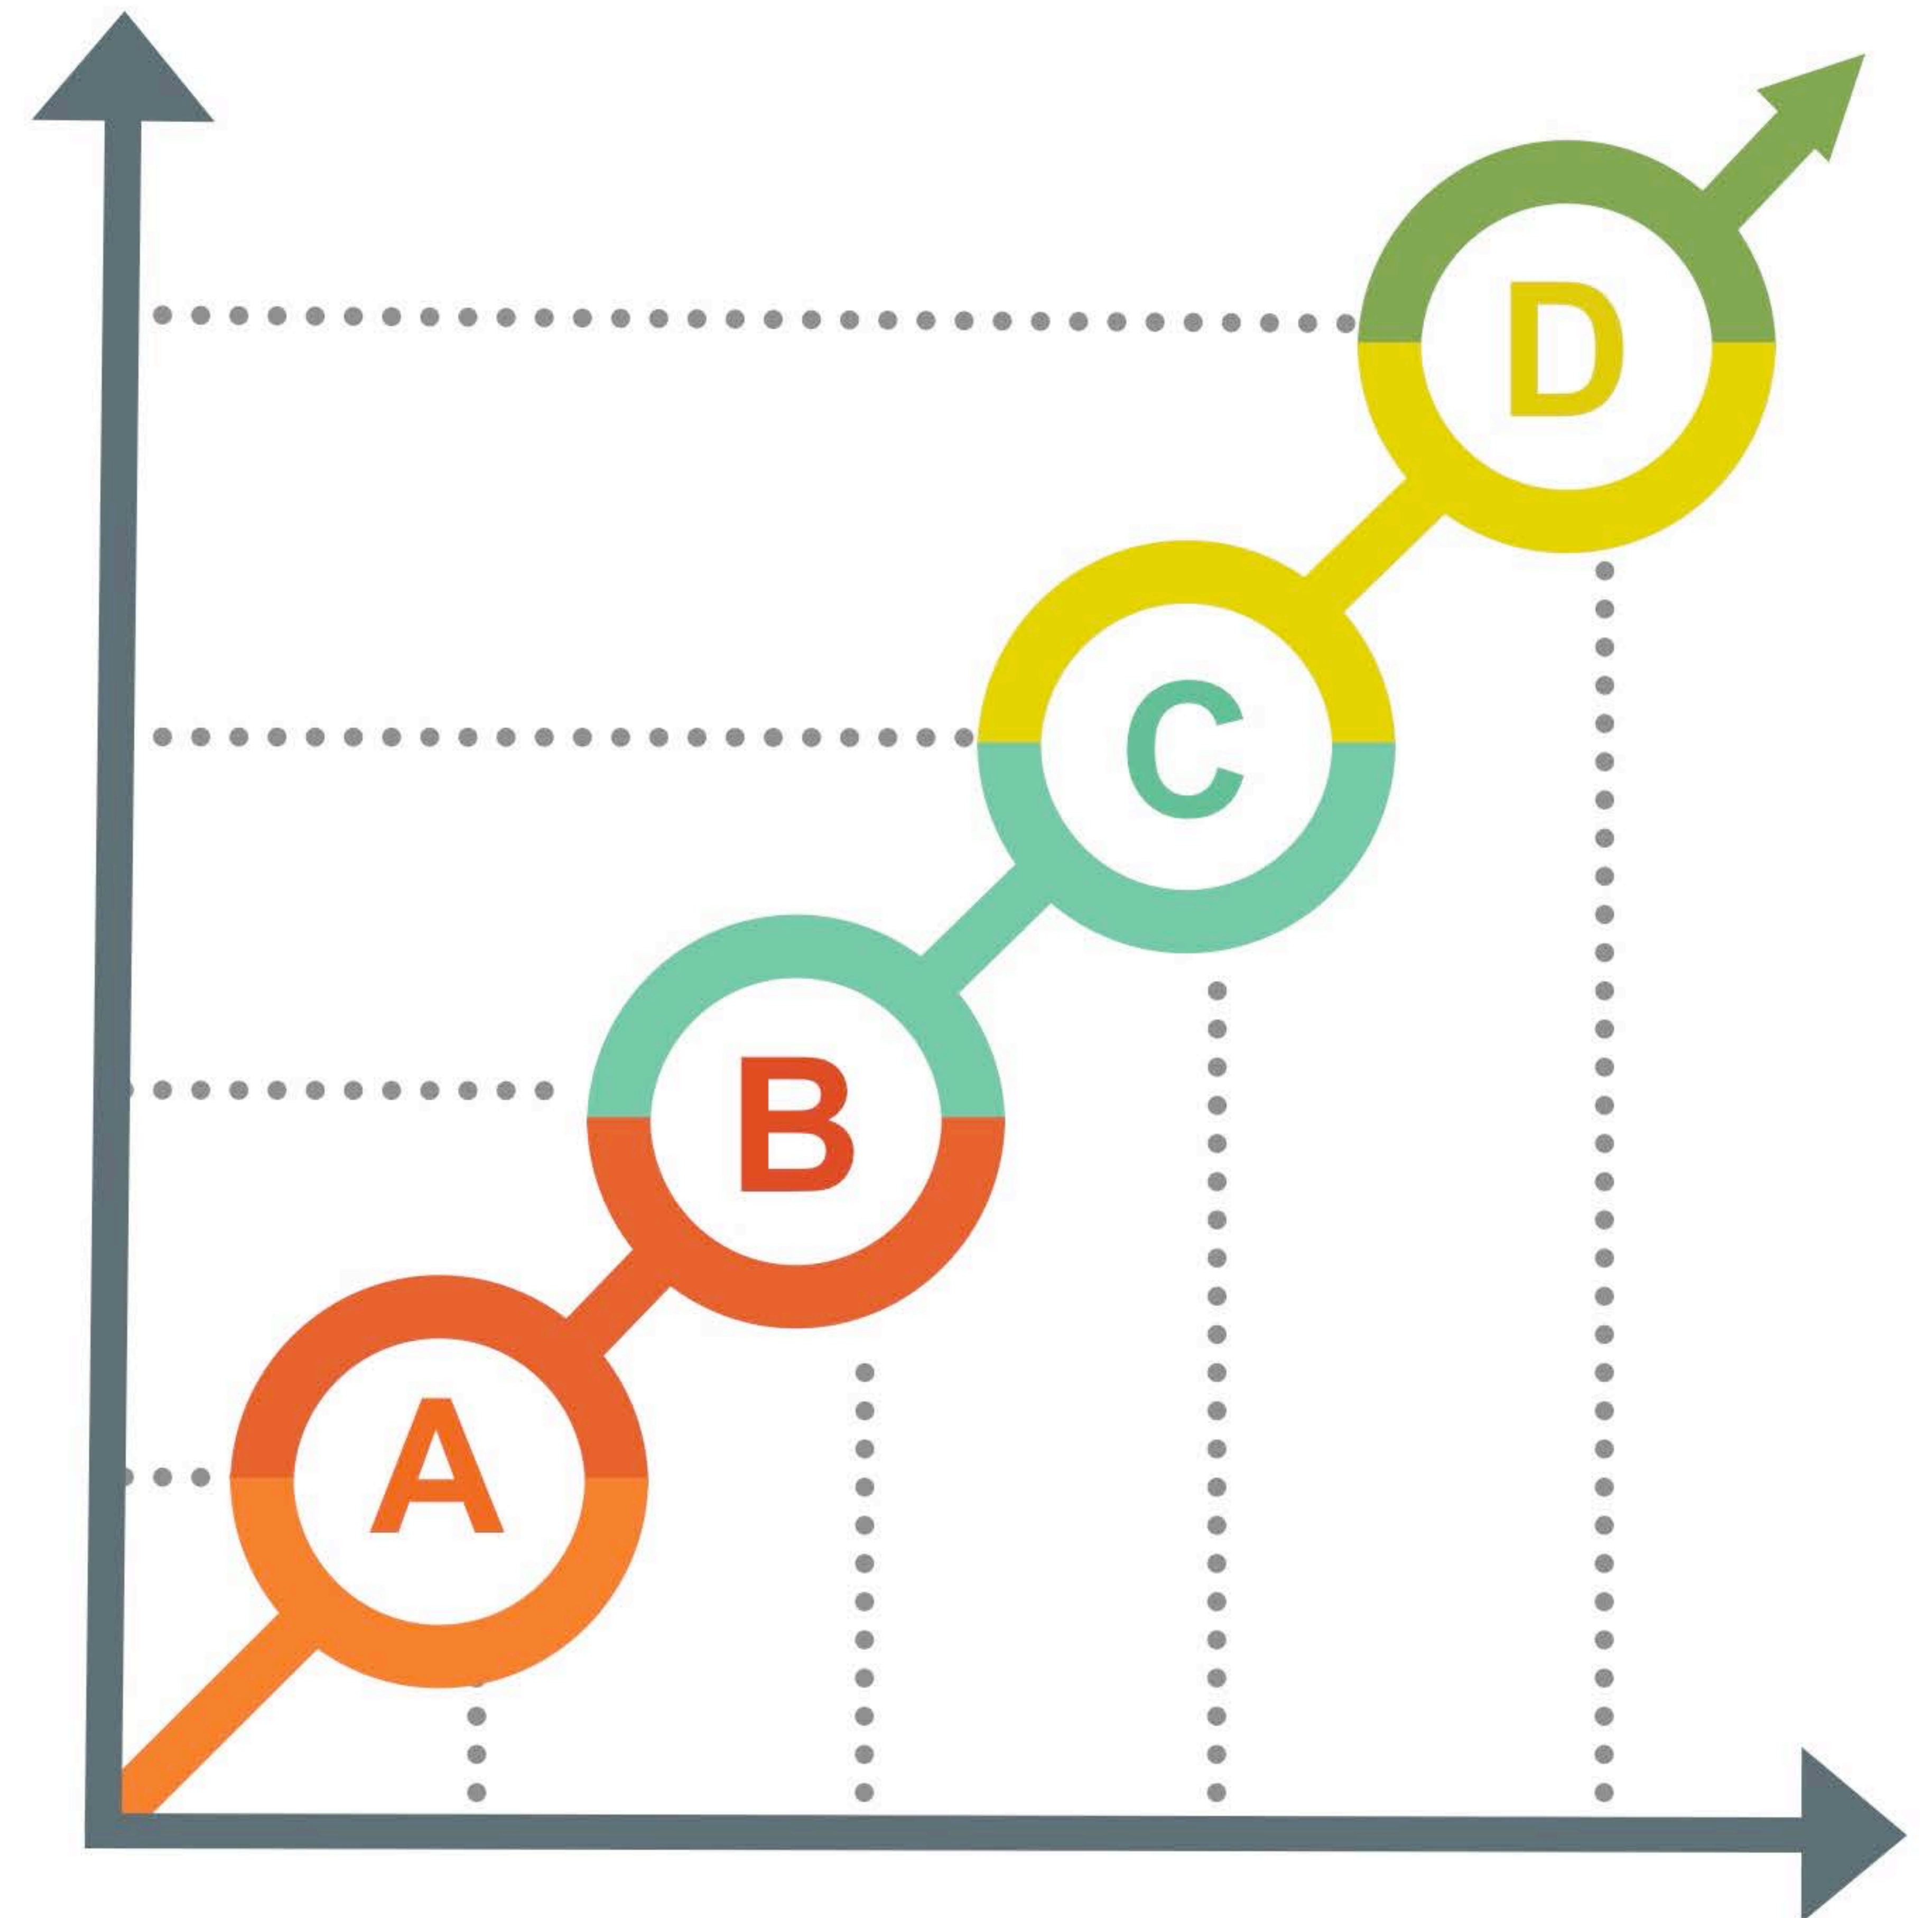

We can't afford
to do it "right"

ENTER SEED IMPACT

THE GOOD NEWS IS...

- A** We can quickly come to love it!
- B** We can dazzle our funders and learn a lot.
- C** It doesn't have to take extra time.
- D** We can do it "right" with the resources we already have!

With the right tool:

Evaluation can show us what's working and what's not to improve our services

Evaluation can reveal participants' strengths *and* guide us to build from strength-to-strength

We can clarify where we are, where we want to be, and how to get there

At SEED Impact, we have been learning with 250+ organizations

... exploring two **big questions**

How can evaluation
accelerate learning?

So it's not about proving but rather *improving!*

How can life-changing
results be quantified?

So our results become credible!

The essential skills for **school and life success** can be grouped into three interconnected domains:

For use in evaluation, SEED defines these as...

(1) emotional competencies

BEING

(2) cognitive skills, and

DOING

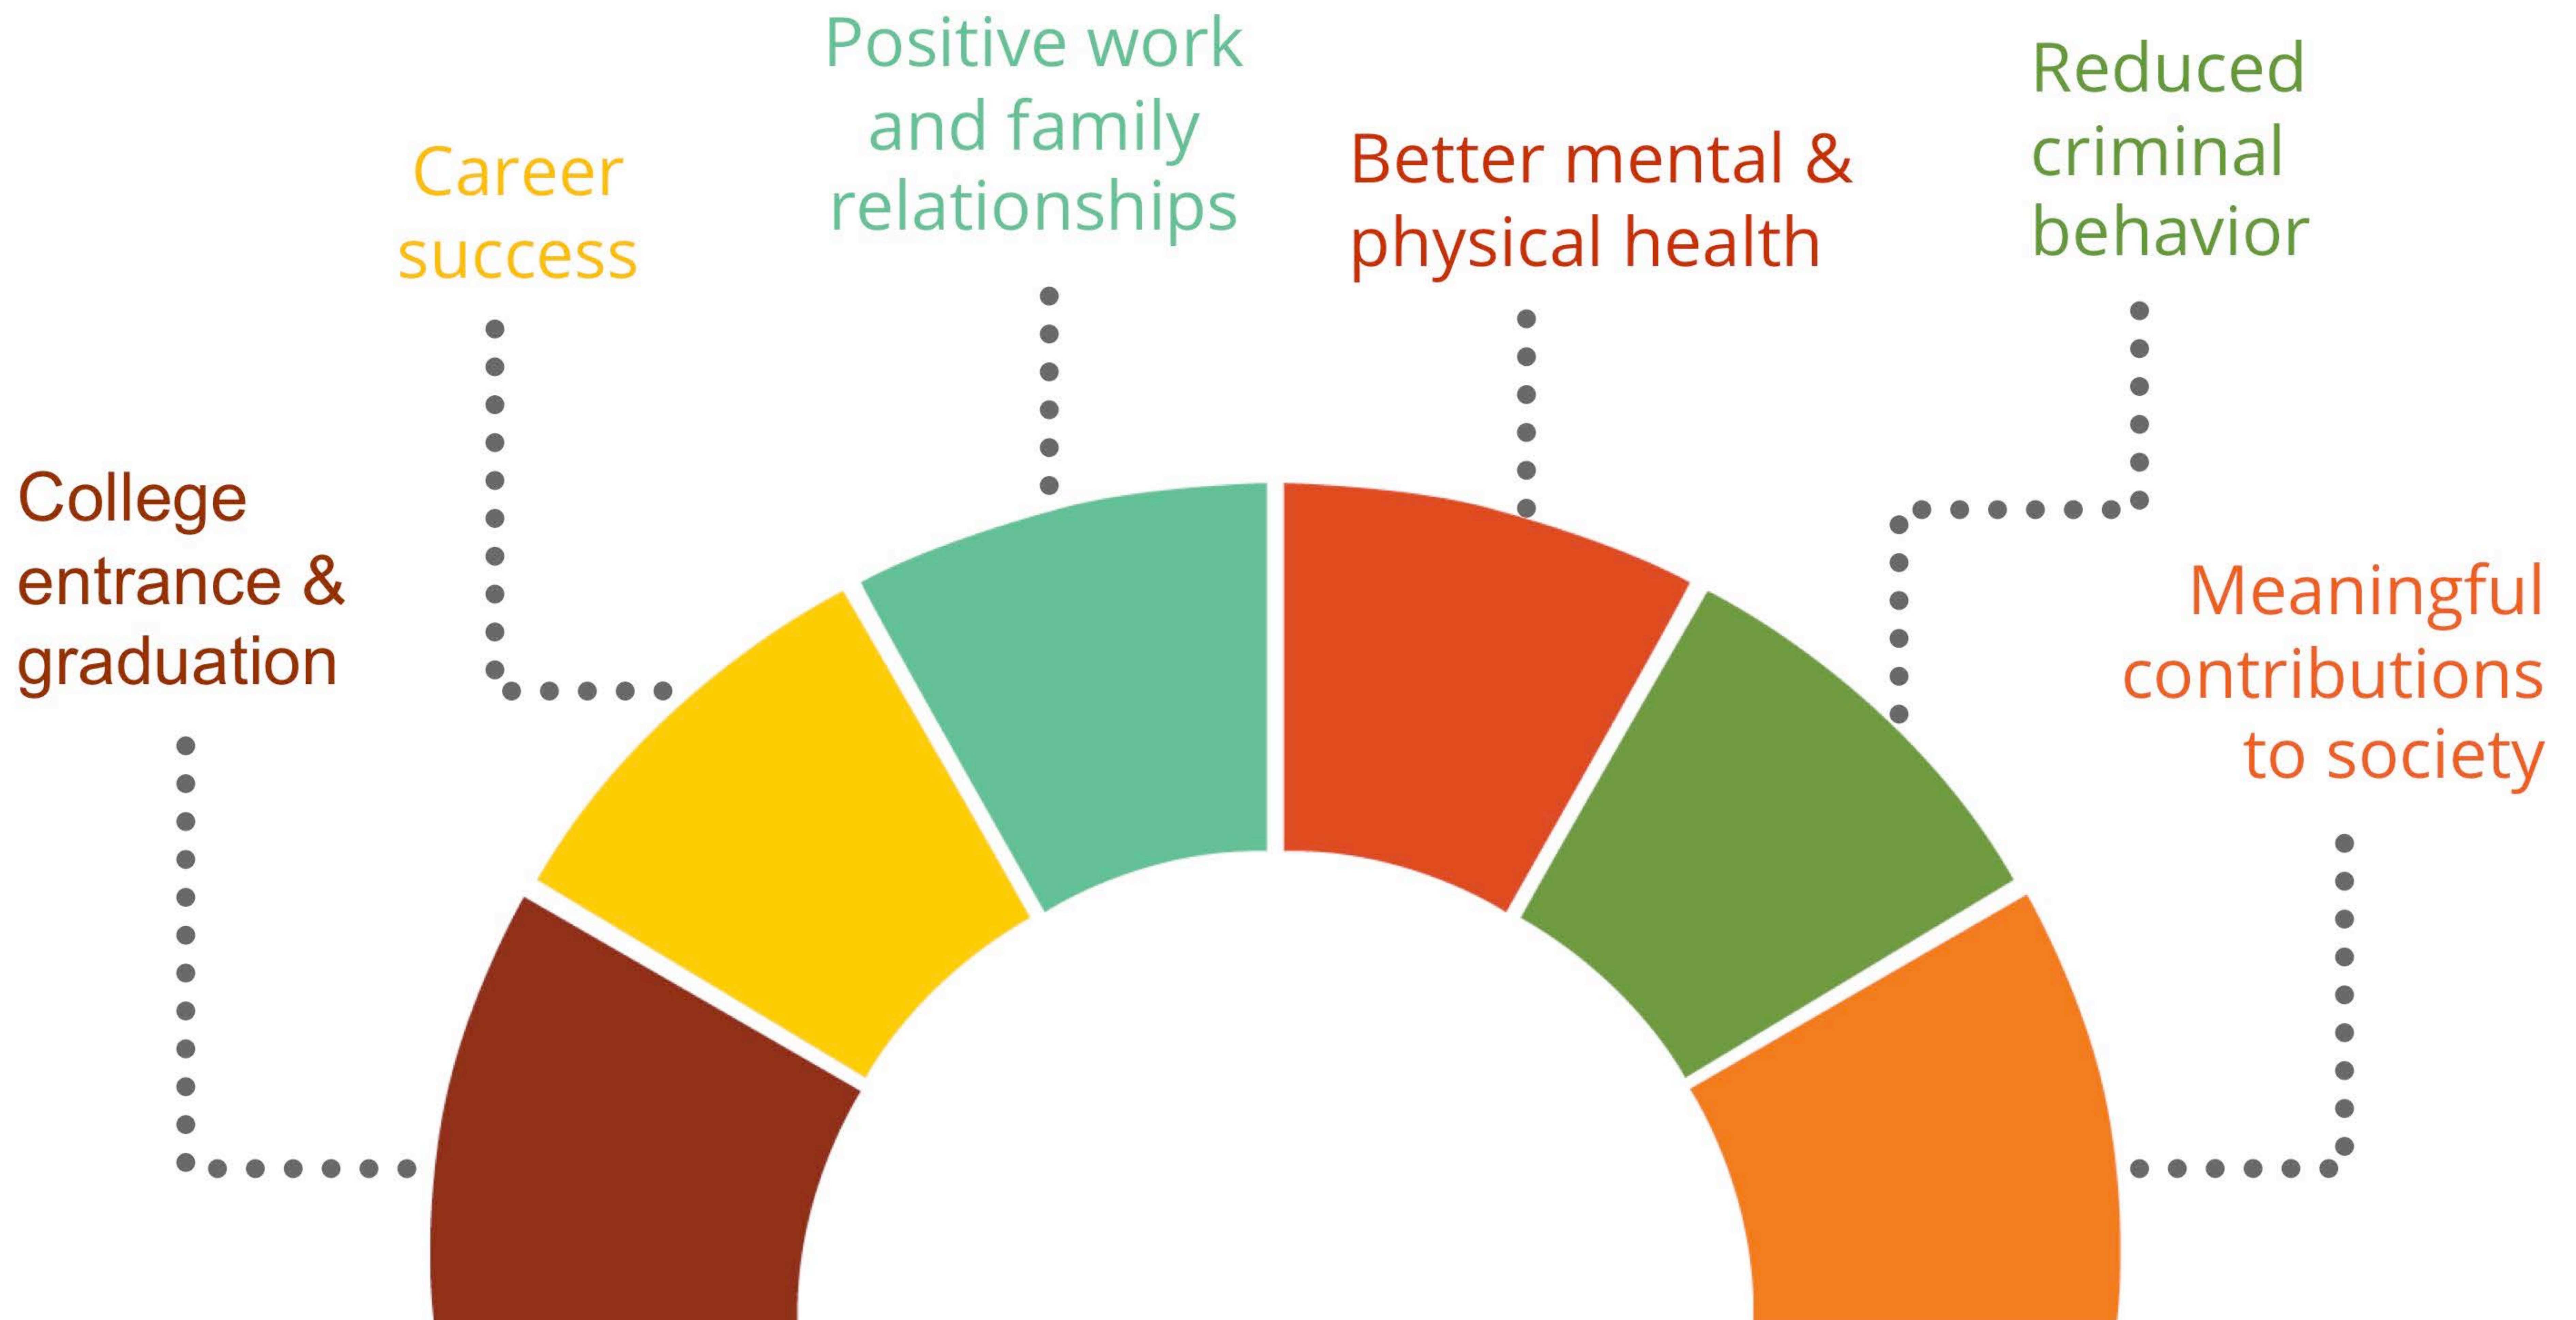

(3) social and interpersonal skills

RELATING

PARALLEL FRAMEWORK

Self-Determination Theory

Well-being is linked with three primary human needs:

1. Autonomy -
perceived agency
and control

BEING

2. Competence -
belief in ability to meet
demands of schoolwork

DOING

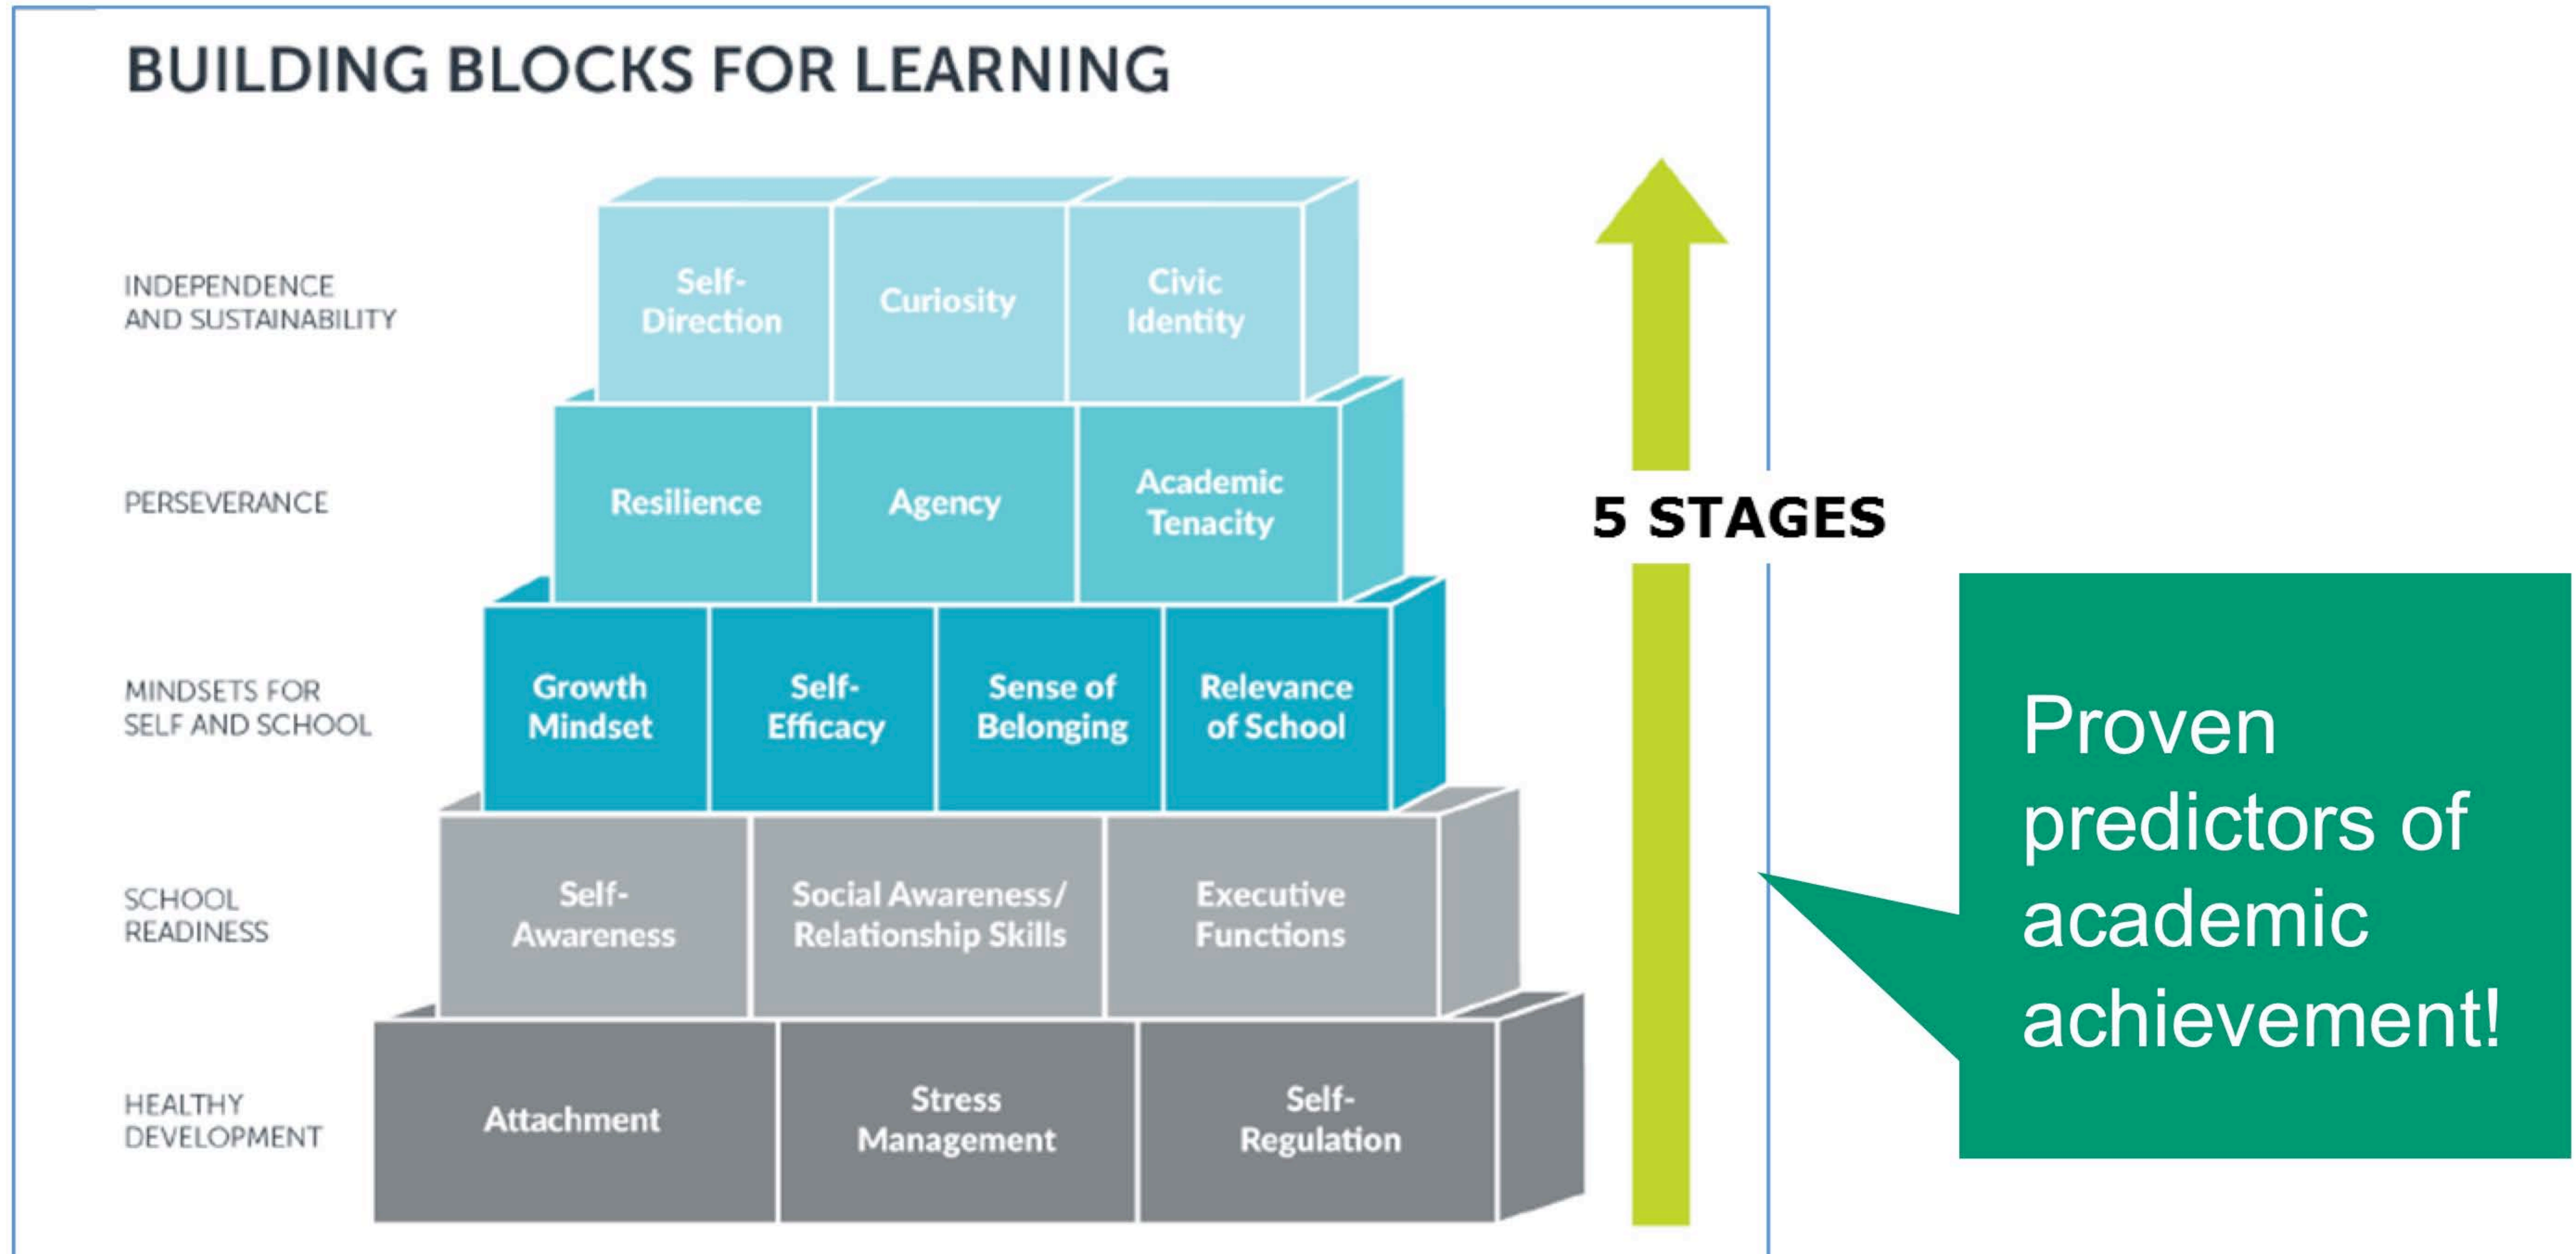

3. Relatedness -
feelings of security, belonging and
attachment

SEED COMPETENCY LADDERS™

LEARN MORE about the Stage Model approach as a complement or alternative to behavior rating scales.

Using the three ladders allows

- **learners,**
- **leaders, and**
- **investors**

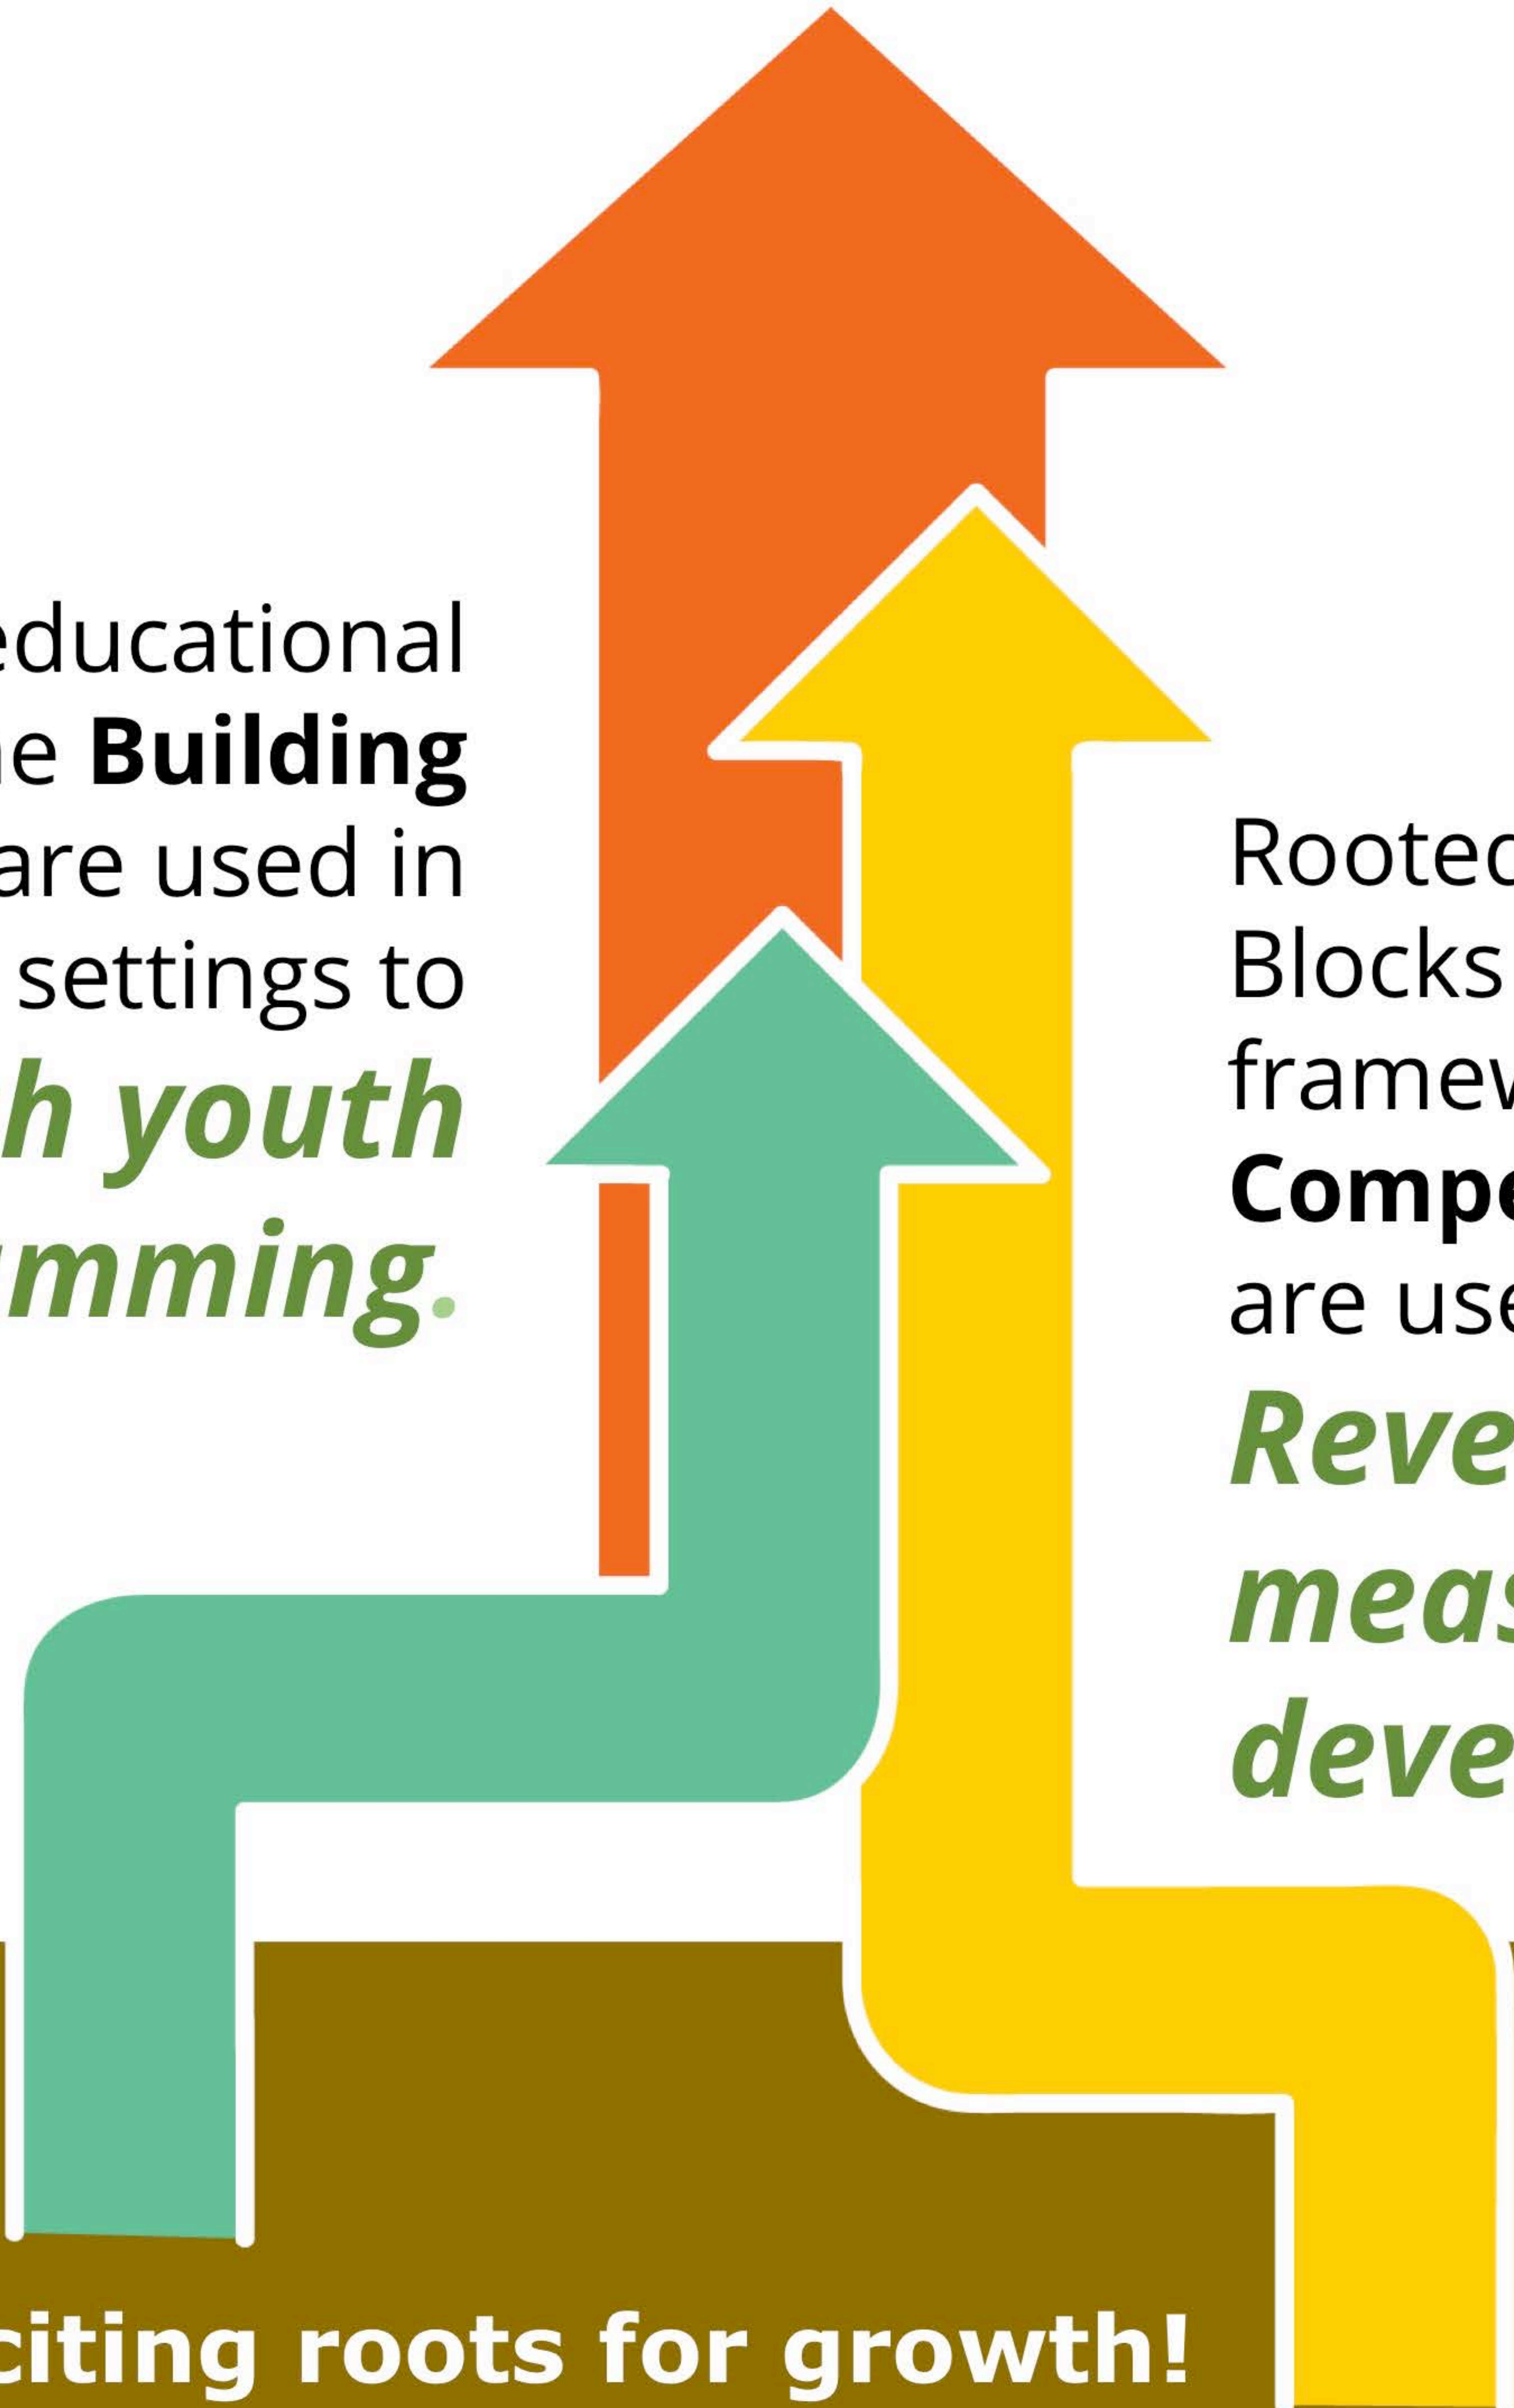

to know that youth are developing the essentials for school and life success.

To better grasp the learner
experience and validate
the ladder scores

We include SEED's

9-ITEM PARTICIPANT FEEDBACK SURVEY

Rooted in educational research, the **Building Blocks** are used in school settings to *Enrich youth programming.*

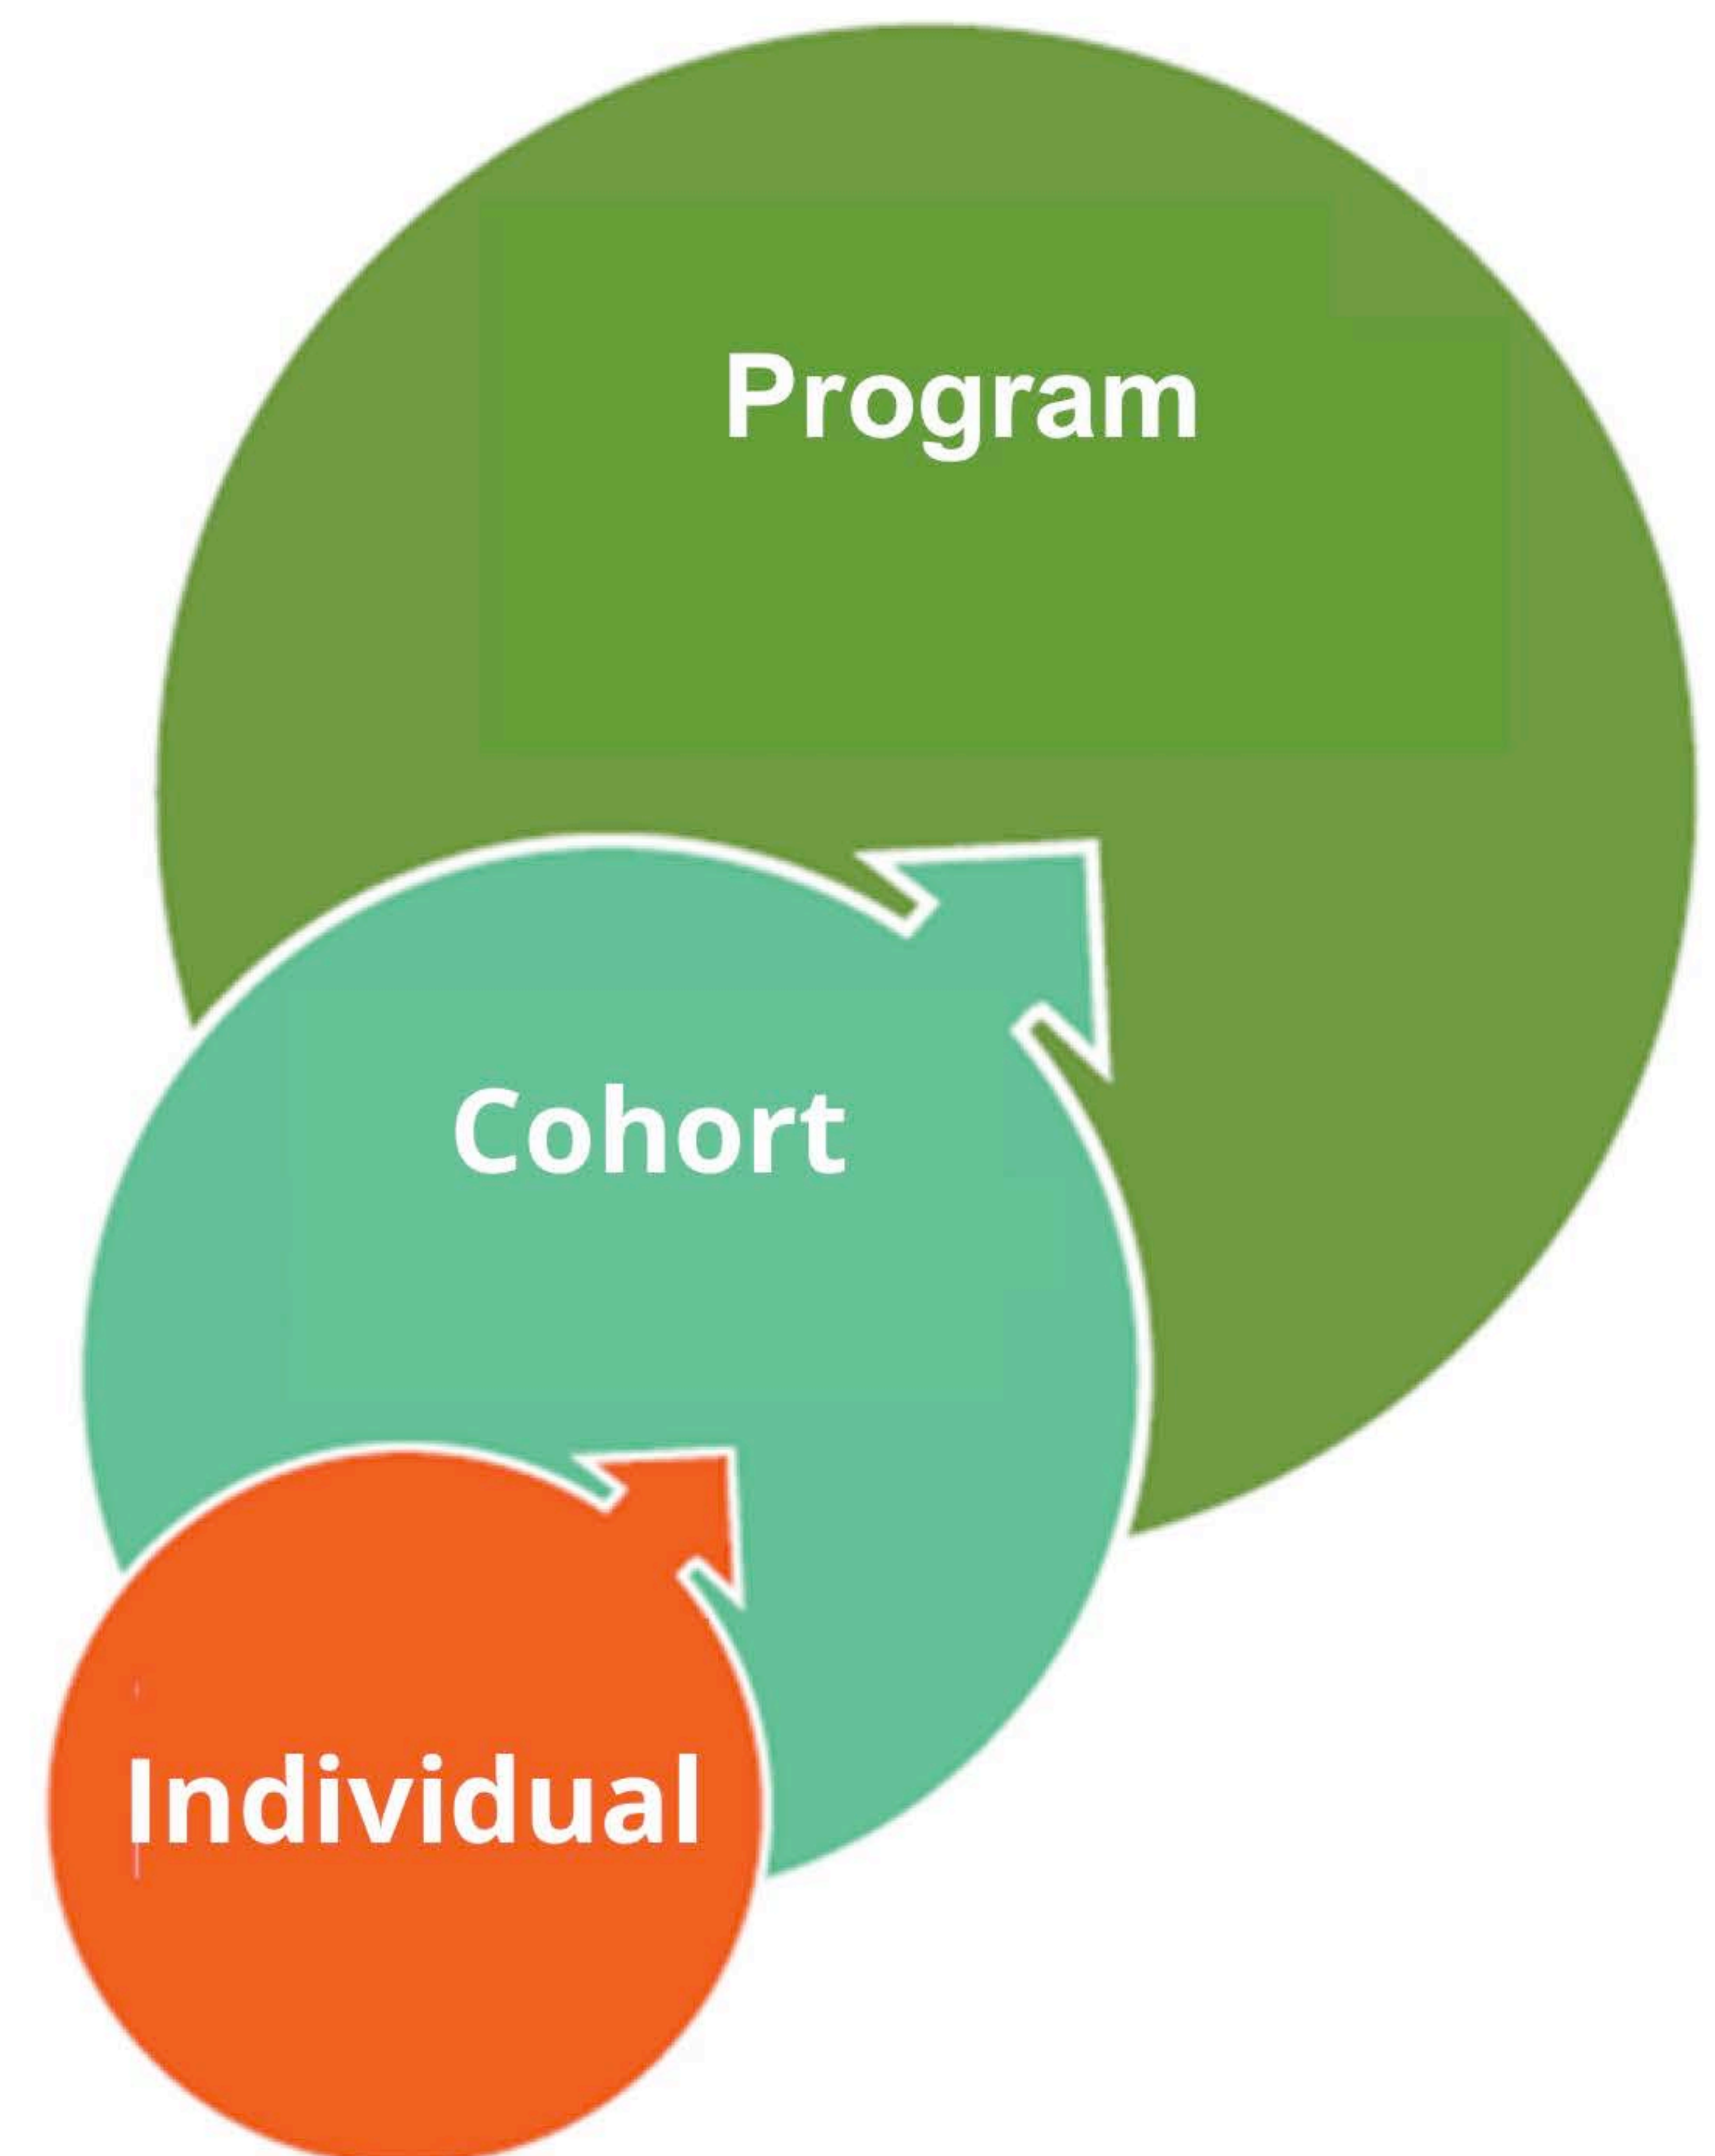

Rooted in the Building Blocks and CASEL SEL frameworks, the SEED **Competency Ladders™** are used to *Reveal hard-to-measure youth development.*

Exciting roots for growth!

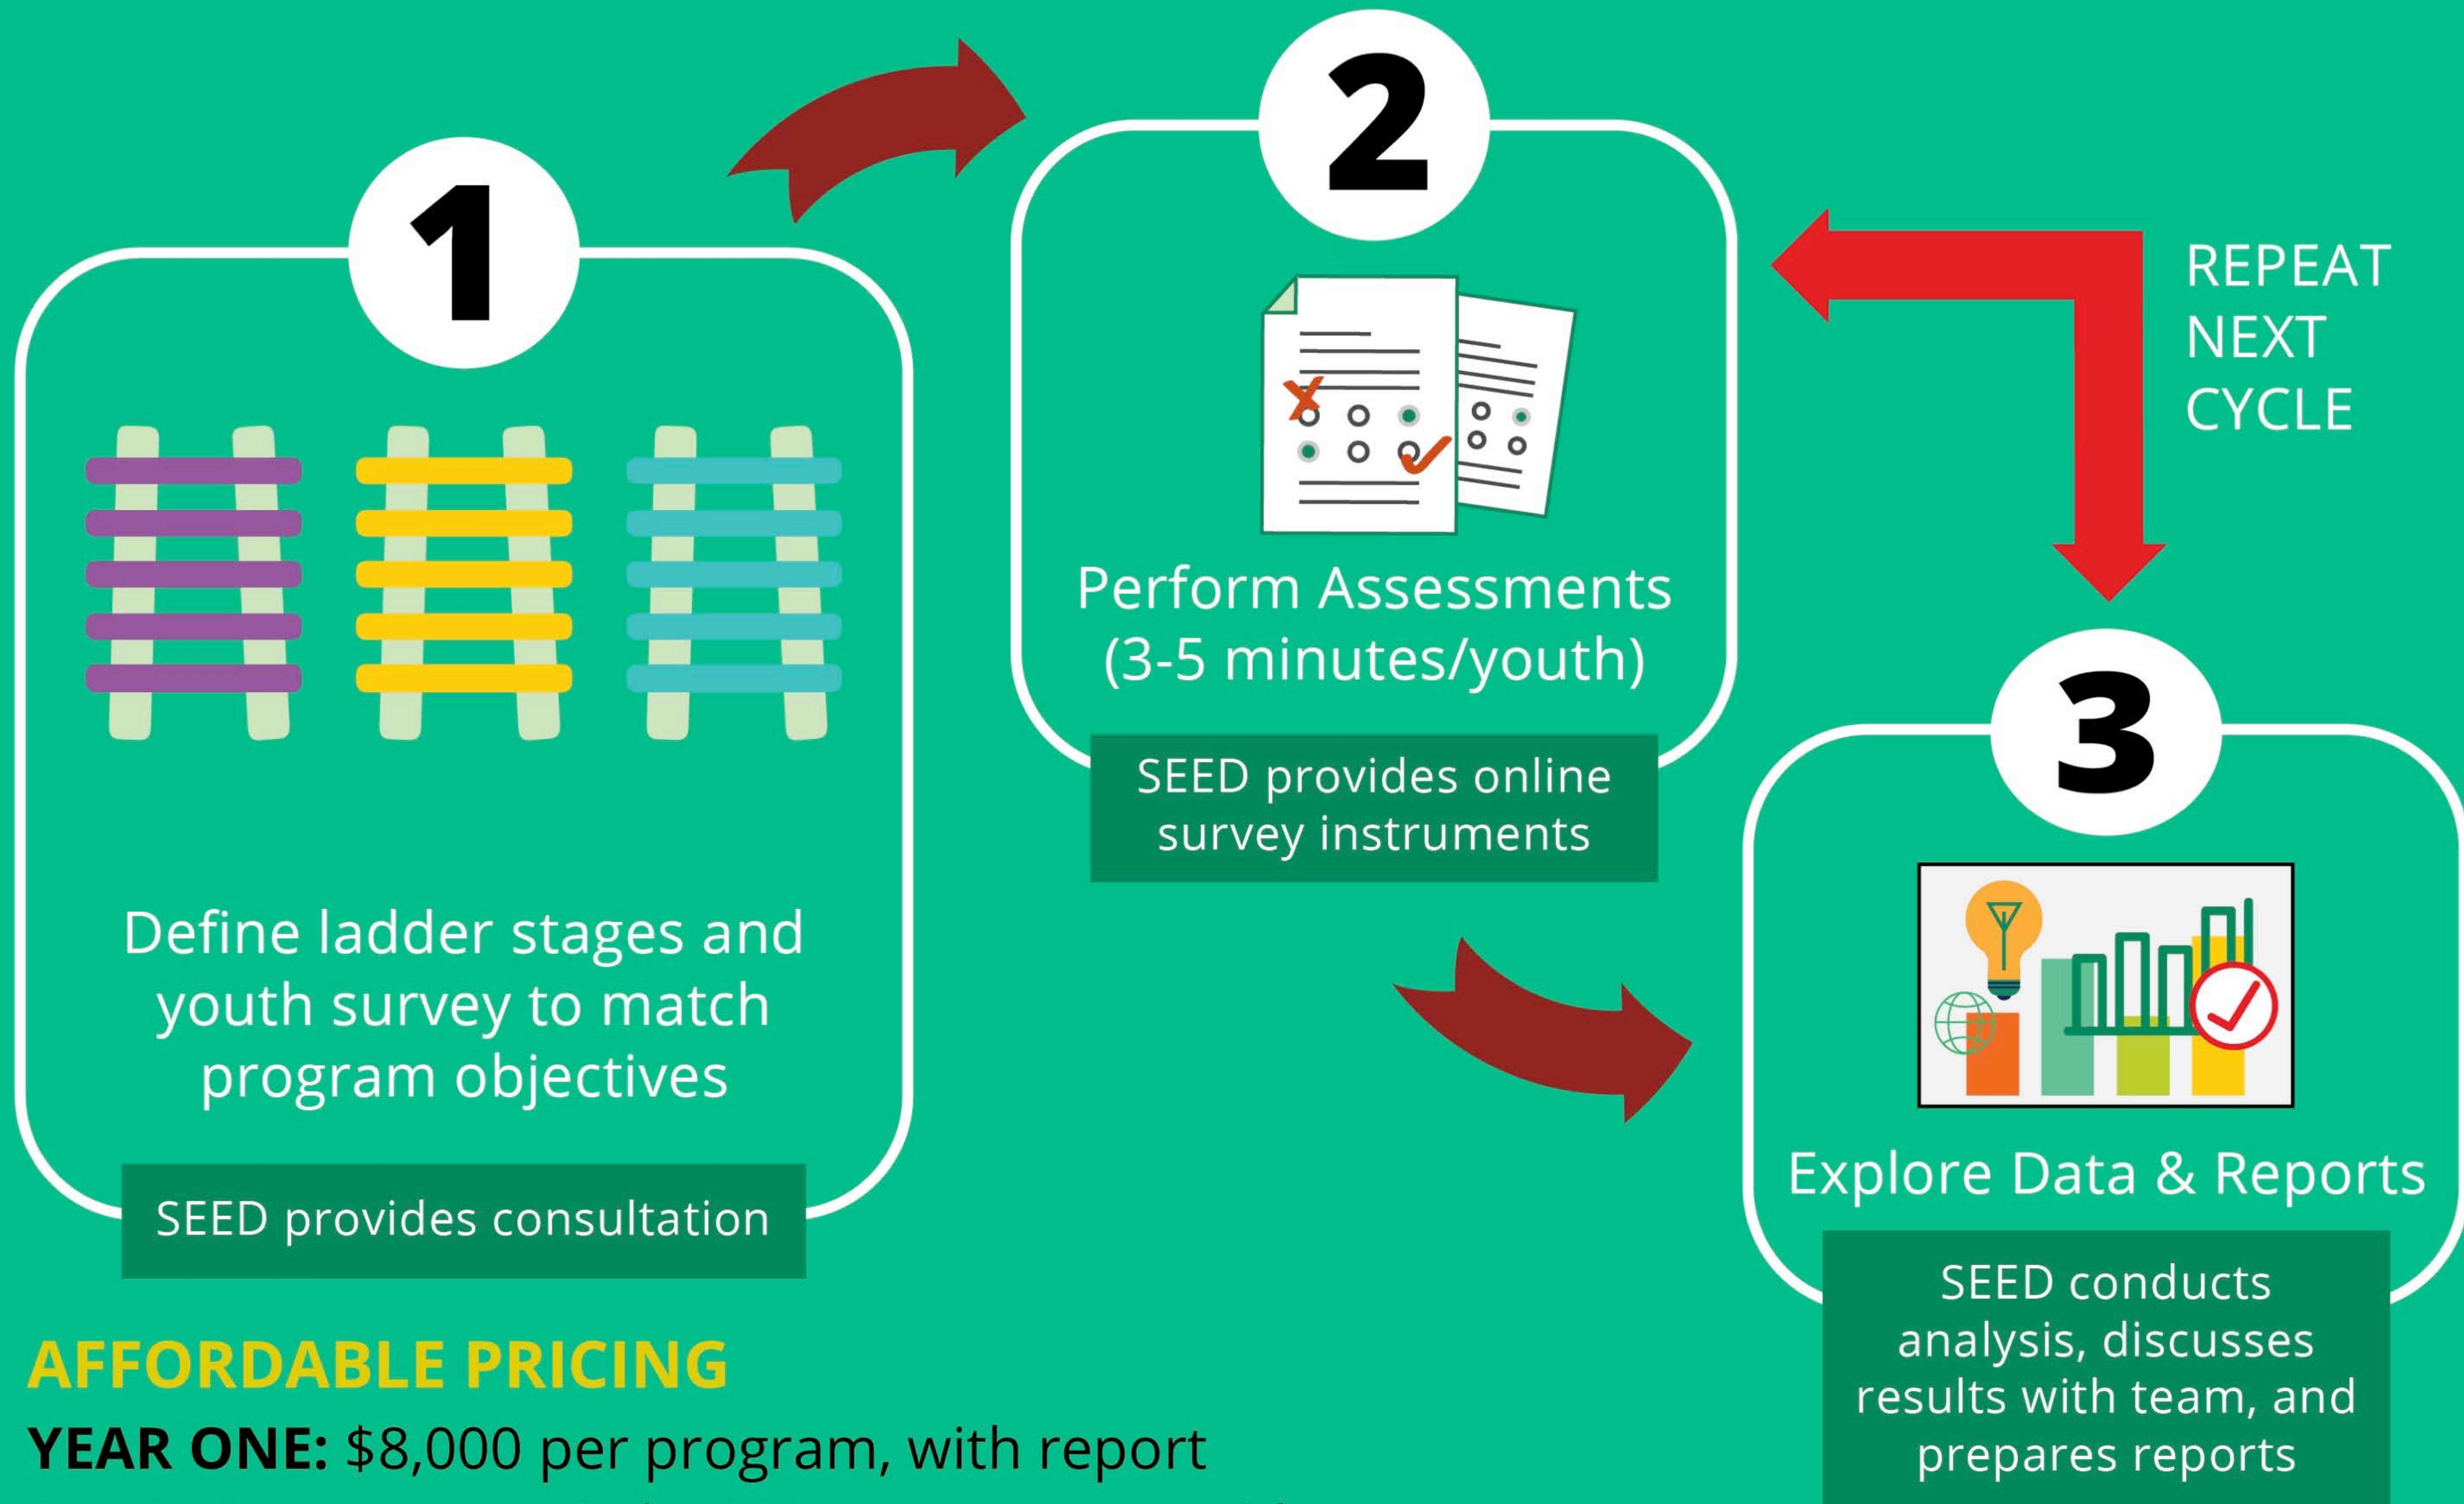

Let's check out a [sample report](#)

VALUE ADDED

**The Competency
Ladders™** reveal how
much *each youth*
and *all youth*
develop over time.

EASY TO IMPLEMENT

AFFORDABLE PRICING

YEAR ONE: \$8,000 per program, with report

SUBSEQUENT YEARS: \$4,000 per program, with report

OPTIONAL INDIVIDUAL YOUTH REPORTS: \$50 each

OPTIONAL ANNUAL AGGREGATE REPORT: \$2,500 per organization

ANTICIPATED CONCERNS: NOT TO WORRY!

How will we define our ladder rungs?

SEED will guide you to define the best indicators for success of your programs, drawing from our growing library of ladder definitions developed with organizations that have widely varying missions. Your ladders will be immediately actionable.

How will our staff manage one more thing?

Assessments take less than 3 minutes each. Staff and volunteers have been consistently delighted by how fast and easy this is to do, and how rich are the resulting data.

How will we share results... and “so what”?

SEED will create first reports targeting the interests of your investors (with templates you can use to generate future reports). Anyone wondering “so what?” will appreciate this credible evidence of your social impact.

ACT NOW

SPACE IS LIMITED

We are offering 10 scholarships at \$4,000 to any 10 organizations who need to accelerate development in their youth programs using SEED's data-driven approach.

VOICES FROM THE FIELD

We like the ability to **compare across programs** – and in the future across partners!

We have long-needed a way to see our impact **over the year, and over multiple years.**

It's easy to administer (260 students tracked)! **Everyone found it easy** to place kids on the ladders.

We appreciate that the construct is **rooted in research** and the ladders are **made specific to each program.**

It challenged our team to **be explicit about skills** we're hoping the youth are developing.

It's affordable and we like that SEED will build our capacity to do more of it on our own over time.

Evaluation used to take time away from our work. **This becomes part of our work and enhances it.**

Feedback from Trinity Boston Foundation (TBF). SEED's close partnership in service to three life-giving TBF programs sparked the genesis of this approach.
